

3RD INTERNATIONAL CONFERENCE ON INNOVATIVE COMPUTING 2019 CALL FOR PAPERS

3rd International Conference on Innovative Computing (ICIC) is a multi-topic conference focusing on a broad range of innovative computing methods and their applications. The ICIC intends to provide an outstanding platform for researchers and practitioners from academia and industry to meet and share their novel ideas and contributions in the field of ICT. The conference has a research papers track and a PhD symposium. The objective of the conference is to provide a platform for researchers and scholars to present their work and gather educated feedback. It endeavors to assemble researchers in order to develop collaboration and cooperation in developing interdisciplinary technology. It encourages original and applied research having impact on industrial and technical advancement. Applications that require real life data from various aspects of life such as management, medicine and engineering bear higher impact on daily life matters. The conference inspires contributors to send research work governing such applications.
