XI Ibero-American Conference on Educational Innovation in ICT and EdTech

Las Palmas de Gran Canaria — November 20-22, 2024

<http://www.innoeducatic.es/>

The XI Ibero-American Conference on Educational Innovation in Information and Communication Technologies (ICT) and Educational Technologies (EdTech) serves as a platform for educators from diverse geographical backgrounds dedicated to pedagogical evolution and the continuous enhancement of teaching and learning. The primary focus of this Conference will be on pedagogical aspects, viewing technology as an essential tool to broaden our educational horizons. We will engage in discussions and reflections on innovative methodologies and emerging educational resources, with a particular emphasis on those propelled by artificial intelligence.

This year, a specific session will be devoted to presenting the ongoing work within the ERUA Alliance (*European Reform University Alliance*) with a special focus on the field of education.

We invite all participants to share their experiences, learn from enthusiastic colleagues and contribute to the advancement of educational innovation in ICT and EdTech. This event is a unique opportunity to establish connections, exchange ideas and generate collaborations that enhance our work as educators.

Our goal is to shape a future where technology and pedagogy effectively complement each other, delivering quality education and preparing our students for the challenges of the 21st century.

We are confident that the XI Ibero-American Conference on Educational Innovation in ICT and EdTech will offer inspirational conversations, learning and collaboration.

We look forward to seeing you in Las Palmas de Gran Canaria!

In collaboration with:

innöeducaTIC 2024

Thematic Areas

1. Teaching methodologies
2. Teaching materials and resources
3. Learning through ICT tools
4. Use of Technologies for Learning and Knowledge
5. Acquisition of skills
6. Techniques and Tools for Evaluation
7. Tutorial action and mentoring
8. Student integration and guidance
9. Coordination and follow-up experiences
10. Digital skills
11. Applications of Artificial Intelligence (AI) in Education
12. Other aspects of Educational Innovation

ERUA2 Special Session - Towards and Academic Innovation Laboratory

The European Reform University Alliance (ERUA) members are encouraged to present experiences based on active methodologies to span in the network. These presentations could be the basis for future interdisciplinary educational innovation projects, putting together teachers and researchers to work for a common interest to develop innovative learning pathways.

Presentation of articles and proceedings of the Conference

Acceptance of papers will be done after evaluation through double-blind peer review. This requires indicating the name and affiliation of authors only in the finally accepted version.

Submissions can be sent in Spanish or English. A proceedings book with an ISBN will be produced. The proceedings of the conference will be published in the institutional repository of the University of Las Palmas de Gran Canaria (ACCEDACRIS).
