

ME@75: RESEARCH FRONTIERS

ORGANIZED BY
Department of Mechanical Engineering
Indian Institute of Science
June 29-July 01, 2022

Mechanical engineering activities at Indian Institute of Science (IISc) started around 1945 in the Department of Internal Combustion Engineering, that later merged with the subsequently created Mechanical Engineering department. On this important milestone of 75 years of Mechanical Engineering at IISc, the department is organizing an *in-person* international conference to be held from June 29-July 1, 2022, to bring together researchers from around the world to interact and establish mutually beneficial research partnerships in all areas of Mechanical Engineering. The conference will feature a number of invited lectures from eminent researchers in the field. Contributed papers are sought primarily from young researchers in all areas of Mechanical Engineering. We invite academics in different career stages to attend this meet and make it a success.

SCOPE

The conference will cover all fields within the broad area of Mechanical Engineering, with an emphasis on experimental, computational, and analytical studies. Contributed papers are invited in all the (non-exhaustive) list of topics, primarily from young researchers in the field. Please see website given below for submission details.

1. Mechanical systems and MEMS

Solid and fracture mechanics, Geometric modelling, Compliant mechanisms, Micro and nano mechanical devices and systems, Soft matter mechanics, Multi-disciplinary optimization, Robotics and autonomous systems, Nonlinear dynamics, Control systems design, Biomechanics and bio-design, Analytical and computational mechanics

2. Material science and nanotechnology

Nanomechanics, Tribology, Material characterization, Nanostructured materials, Computational material science

3. Thermal sciences and fluid mechanics

Bio-fluid mechanics, Turbulence, Stability and transition, Fluid-structure interaction, Turbomachinery, Multiscale flow physics and transport, Combustion and spray research, Convection, Transport phenomena in manufacturing, Computational fluid dynamics, Flow and combustion in IC engines and gas turbines, Energy engineering

4. Vibrations and acoustics

Structural acoustic systems, Vibrations of plates and shells, Wave propagation, Industrial noise control, Active noise control, Fluid-structure interaction, Flow noise

PATRON

G. Rangarajan, Director, IISc

ADVISORY COMMITTEE

Vijay H. Arakeri
T.S. Mruthyunjaya
M.L. Munjal
S. Seshan
K.R.Y. Simha

ORGANIZING COMMITTEE

R.N. Govardhan (Chair)
Aloke Kumar (Co-Chair)
Jishnu Keshavan (Secretary)
SCIENTIFIC COMMITTEE
Gaurav Tomar (Chair)
Ramsharan Rangarajan (Co-Chair)

CONTACT DETAILS

Raghuraman N. Govardhan, Chair
Department of Mechanical Engineering
IISc, Bengaluru – 560012, India

VENUE

JN TATA AUDITORIUM,
Indian Institute of Science,
Bengaluru -560012

CONTACT EMAIL

me75.conf@iisc.ac.in

SUBMIT ABSTRACT ONLINE AT

<https://easychair.org/cfp/ME75>

IMPORTANT DATES

15th May: Extended abstract submission
1st June: Acceptance notification
