Call for Papers

The International Conference on Data-Driven AI (ICDDA) aims to create a premier forum for research interactions in data-driven AI and applications. The objective is to bring budding researchers, established academicians, experts, and practical innovators from the world over under a common platform for exchanges of innovations and advancements in data-driven AI technology that play a crucial role in different domains and bring comfort in human lives.

The program shall consist of themed workshops, tutorials and presentation of research papers in the areas of **Data Driven AI Applications in Agriculture, Healthcare, Sustainable Developments and Security.**

Submission Procedure

All submissions will undergo plagiarism checks. The length of a paper should be between 10 to 12 pages (including references) with similarity score of less than 10%. The authors should prepare their manuscripts using the Springer Conference style format. Every submission will be reviewed for quality assessment.
